Modernize the work experience with Dell PCs + Windows 11

A Shifting Dynamic

The business landscape has changed dramatically as organizations adapt to today's hybrid workstyles.

75%

Remote Vulnerability

75% of users feel that hybrid work leaves them vulnerable to security threats.¹

86%

Outdated Hardware

86% of organizations say that outdated hardware leaves them more open to attacks.¹

87%

Cyberattack-Prone

87% of users have experienced at least one attack in the past two years.¹

Windows 10 will go into end of support on October 14, 2025

Start planning now for migration to Windows 11 and the latest Dell devices for a completely re-imagined experience that better fits today's more modern hybrid work environments.

The Backbone of the Modern Workplace

The industry's most secure commercial PCs² and the most secure Windows yet, Windows 11, deliver the flexibility and controls businesses need to succeed.

A recent study by Forrester stated the total economic impact of Windows 11.

20%

Participants reduced the risk of a successful security attack by 20%.³

80%

Participants reduced the number of help desk tickets by 80%.³

25%

Participants decreased in-time deployment of devices by 25%.³

Work anywhere and secure everywhere with the Power of Dell + Windows 11.

Strengthen Your Workforce

Empower your IT teams to effortlessly migrate Dell devices—and simplify work with Microsoft 365 and other apps.³

For end-users:

- Personalized experiences
- Smarter video conferencing
- Quick connection and collaboration

For IT:

- Familiar, user-ready tools
- Effortless cloud management
- Fast and easy updates
- Enhanced security

Harden Your Security

Activate Zero Trust with the comprehensive defense framework of Dell Trusted Workspace and Windows 11.

Built-in Dell hardware and firmware protections:

- SafeBIOS detects potential tampering with secure off-host BIOS verification and Intel ME firmware verification
- SafeID - a dedicated FIPS Level 3 security chip secures end user credentials

Powerful Windows protection:

- Enhanced phishing safeguards with Microsoft Defender SmartScreen
- Layers of application security that help safeguard critical data
