

Market Report

As a Top Rated Application Security tool on TrustRadius, Veracode is a leader in application risk management, offering a unified platform for comprehensive visibility and control over software and applications from code to cloud. Real users report that using Veracode resulted in positive return on investment (ROI) and improved risk management processes, from increased visibility into security posture, helpful reporting and analytics, and security from end-to-end in the software development process.

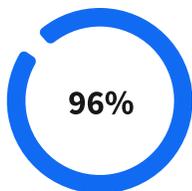

Overall Satisfaction

TrustRadius asks each reviewer key insights questions about every product to give buyers a quick overview of how the product performs. Veracode scores well in all five categories.

Veracode Key Insights

Delivers Good Value for the Price

96% of TrustRadius reviewers said Veracode delivers good value for the price.

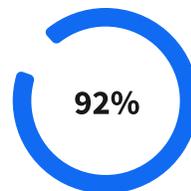

Lived up to Sales and Marketing Promises

95% of TrustRadius reviewers stated that Veracode lived up to sales and marketing promises.

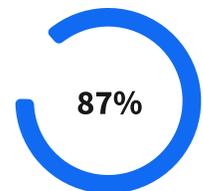

Happy with the Feature Set

95% of TrustRadius reviewers indicated being happy with Veracode's feature set.

Would Buy Again

92% of TrustRadius reviewers said they would buy Veracode again.

Implementation went as expected

87% of TrustRadius reviewers said implementation of Veracode went as expected.

Veracode is easy to manage and integrate with other systems.

“Veracode is a very good static, dynamic, and software composition code analysis tool. It is easy to manage and supports most commonly used development languages. It integrates well with a number of code repository systems, such as Azure DevOps and GitHub.”

Verified User | Contributor in Information Technology | Consumer Goods, 5001-10,000 employees Incentivized

This user finds Veracode to be a valuable and informative security solution.

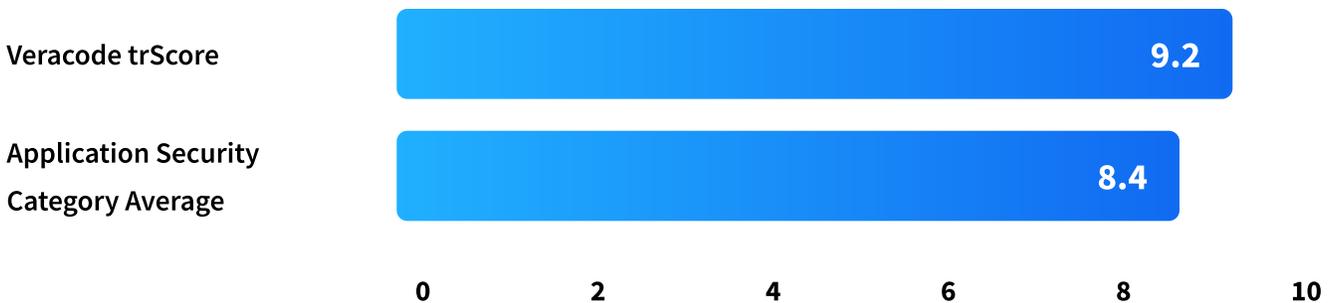

“Within our organization it is clear that when a codebase is available, and in a language that Veracode supports, the use of Veracode (with a particular focus to the static scanning platform) is a great suggestion. The depth of information it can provide with respect to security flaws is valuable, with very little setup required from the developers.”

Risk Assessment & Management

Veracode's Risk Management and Security capabilities include...

- Reporting & Analytics
- Risk visibility
- Compliance assurance
- Automated risk resolution
- Security testing
- Security posture overview

Veracode's reporting features improve visibility for this organization.

“Reporting and analytic features are crucial components of any security tool, as these provide visibility into the security posture of an organization's environment. We use all the Analytics and Reporting features of Veracode as it provides all the details that we need to work to secure our applications and to provide the necessary data to upper management.”

Verified User | Engineer | Computer Software, 501-1000 employees Incentivized

Automated monitoring with Veracode enhanced the security posture of this organization.

“Veracode's platform has had a very positive impact on our security posture, paving the path towards having coverage monitored automatically on hundreds of internal applications throughout the development lifecycle. [Veracode improved] the security knowledge of our development team, providing meaningful feedback as well as training options to reduce mitigation time and help to prevent flaws before they are created.”

Verified User | Employee in Information Technology | Airlines/Aviation, 5001-10,000 employees Incentivized

This user found Veracode to be useful in these areas:

- “High effectiveness in detecting insecure code.”
- “Streamlined release cycle by building security controls into deployments.”
- “Highly customizable reporting simplifying reporting to stakeholders.”

Verified User | Director in Information Technology | Computer Software, 51-200 employees Incentivized

Veracode's security scans helped this organization address other areas needing improvement.

“When we performed our initial scans with [Veracode], it was an eye-opening experience for us. Third-party libraries had been ignored for years, and the results had us scurrying to find alternatives and upgrades for fixes of these findings. This renewed focus on security had us also pursuing other areas where we could add security improvements within our applications, like adding MFA abilities.”

Verified User | C-Level Executive in Product Management | Computer Software, 51-200 employees Incentivized

Veracode identified vulnerabilities that put this user's information at risk.

“Veracode has helped a lot in securing our development process as the [Veracode IDE] helps us to find security vulnerabilities at very early stages, and fixing any findings at this stage reduces a lot of cost, manual efforts, and the risks associated with it.”

Verified User | Engineer | Computer Software, 501-1000 employees Incentivized

Return on Investment (ROI)

Veracode users report on their ROI in every TrustRadius review. Outside of security-related features, listed below are several standout positive ROI observed by real users.

Using Veracode saved time and helped developers improve their skill set.

- “The time spent on doing peer code reviews went down. Peers who did the reviews had more time to spend on other tasks other than doing peers' code reviews.”
- “Over time, the more seasoned developers were more proficient with writing code, and I think it was a direct result of the implementation of Veracode.”

Verified User | Contributor in Information Technology | Consumer Goods, 5001-10,000 employees Incentivized

Veracode helps small teams accomplish large tasks in less time.

- “Fast results allow our team to find problems and solutions quickly.”
- “[Veracode] allows smaller teams to accomplish a large amount of code review in a short amount of time.”

Alex Fuglaar, CISSP | Manager | Crowe | Telecommunications, 1001-5000 employees Incentivized

This user’s organization saved money and reinforced their reliability with Veracode.

- “Consolidation of tools has saved our org thousands of dollars.”
- “The platform lets us quickly demonstrate to external auditors that we're continuously monitoring our platform.”

Verified User | Manager in Information Technology | Information Technology & Services, 201-500 employees Incentivized

Likelihood to Renew

Veracode is rated an 8.5/10 for likelihood to renew in the Application Security category. This indicates that a majority of Veracode’s customers are satisfied with the product and the ROI they experienced while using it.
