

BUILT FOR TOMORROW'S EMERGENCIES. **READY TODAY.**

T-Priority offers **the nation's first 5G slice dedicated to first responders, including the Department of Defense**—providing better speeds and reliability than ever before for data-intensive applications and connected devices to help ensure agencies operate efficiently—even in rare times of congestion.

Data is now essential for first responders and DoD commands, with new technologies emerging that increase demand on networks. Agencies can suffer from frequent network congestion, insufficient data speeds, and network configurations that aren't adaptable to evolving public safety needs. **T-Priority delivers a better 5G network for first responders and military operations.**

More capacity.

Our network offers **up to 40% more 5G capacity** for first responders and defense agencies than other providers.

Better 5G coverage.

Our network **reaches 98% of Americans** across more than two million square miles.

Faster speeds.

We offer a performance baseline **2x faster** than we've given first responders and defense agencies before.

Critical connectivity.

Receive priority for both voice and data, helping to keep your critical communications and data applications on devices like laptops and tablets running smoothly.

**Our 5G Standalone network unleashes the full capabilities of 5G—
providing dedicated network resources to first responders and the DoD.**

Visit [T-Priority.com](https://www.t-mobile.com/priority) to unlock your agency's full potential.

PUBLIC SAFETY DEPENDS ON **SEAMLESS CONNECTIVITY.**

Our 5G Standalone Core unlocks the potential to deliver the performance public safety and defense agencies need.

Reliable data with T-Priority.

- The network slice helps ensure enhanced quality of service and faster 5G speeds for public safety users.
- In rare times of extreme congestion, our network offers the highest level of priority to T-Priority users.
- Mission-critical devices like connected laptops and tablets benefit from consistent connectivity and reliable performance, enabling uninterrupted access to vital applications.
- With the slice, T-Priority users experience **up to 5x better priority** than the average user.
